Introduction

- A lot of individuals struggle with typing skills in everyday life.
- A dedicated typing exercise tool can be the solution
- Introducing **TypeDrift**, a lightweight, CLI-based typing performance monitor

Visualization Diagram

Motivation

- 1 Creating an **easily accessible** typing environment
- 2 Boosting personal typing **speed** and **accuracy**
- 3 Creating a **distraction-free** environment to practice typing
- 4 Tracking personal **WPM records**

Key Features

Main Features

Typing Speed Practice

- Different practice modes
- Multiple difficulty levels
- Track WPM and Time elapsed
- Generate a session report

Mini game

- Different engaging mode so that user doesn't feel bored
- Creates a more competitive environment for the user

Track Records

- Track personal Statistics
- Check Global Leaderboard
- Visualize Statistics
- Accuracy analysis

Key Features

Side Features

Create Account

Multiple users

Session stats

**Global
Leaderboard**

Generate Report

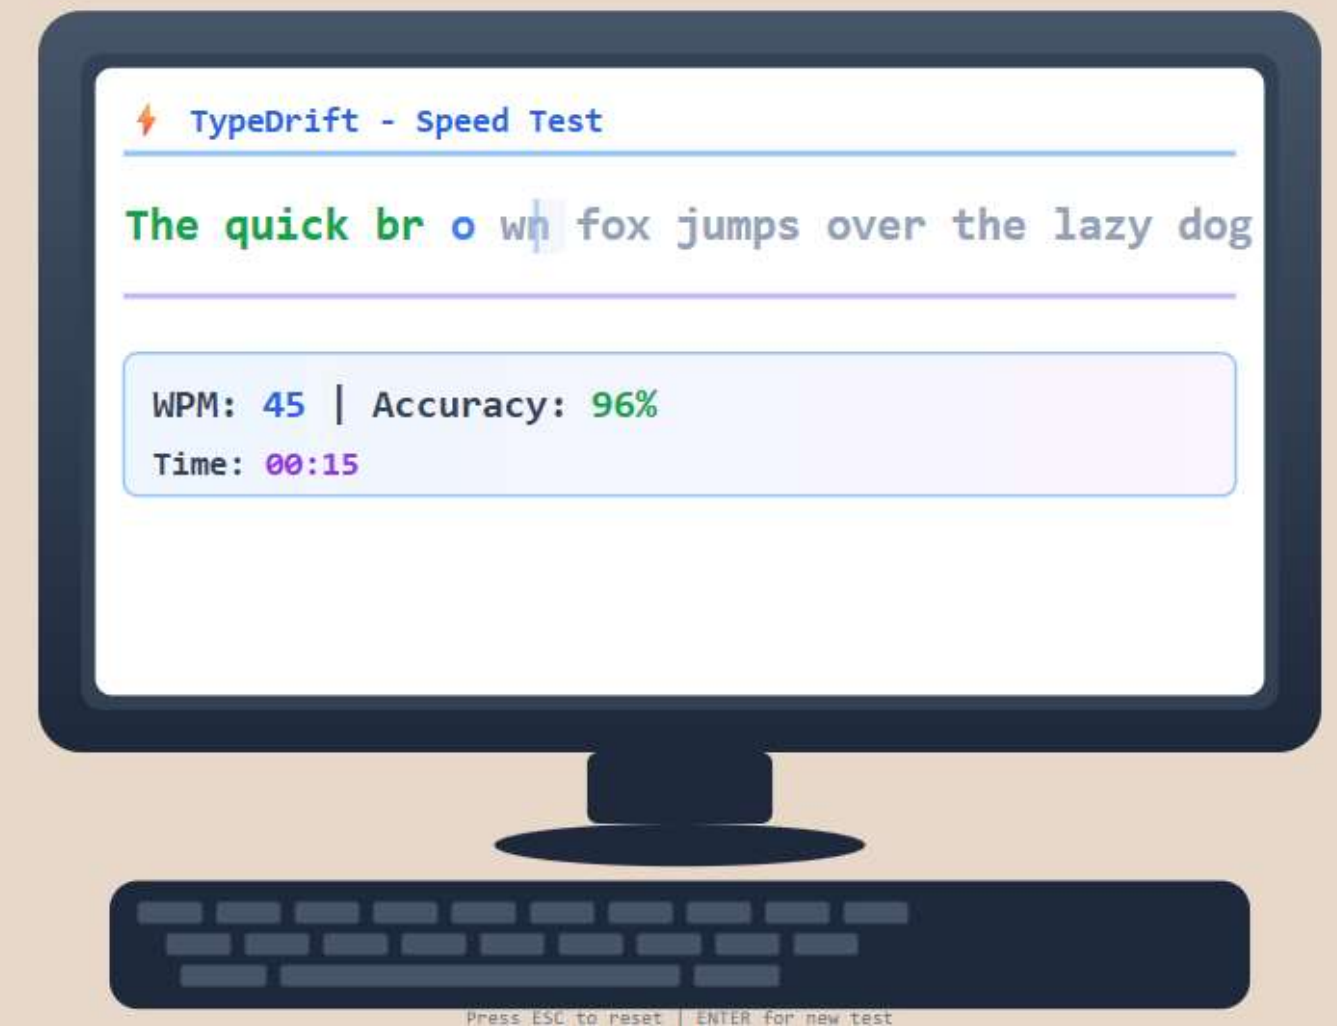

Compare Results

**User
Authentication**

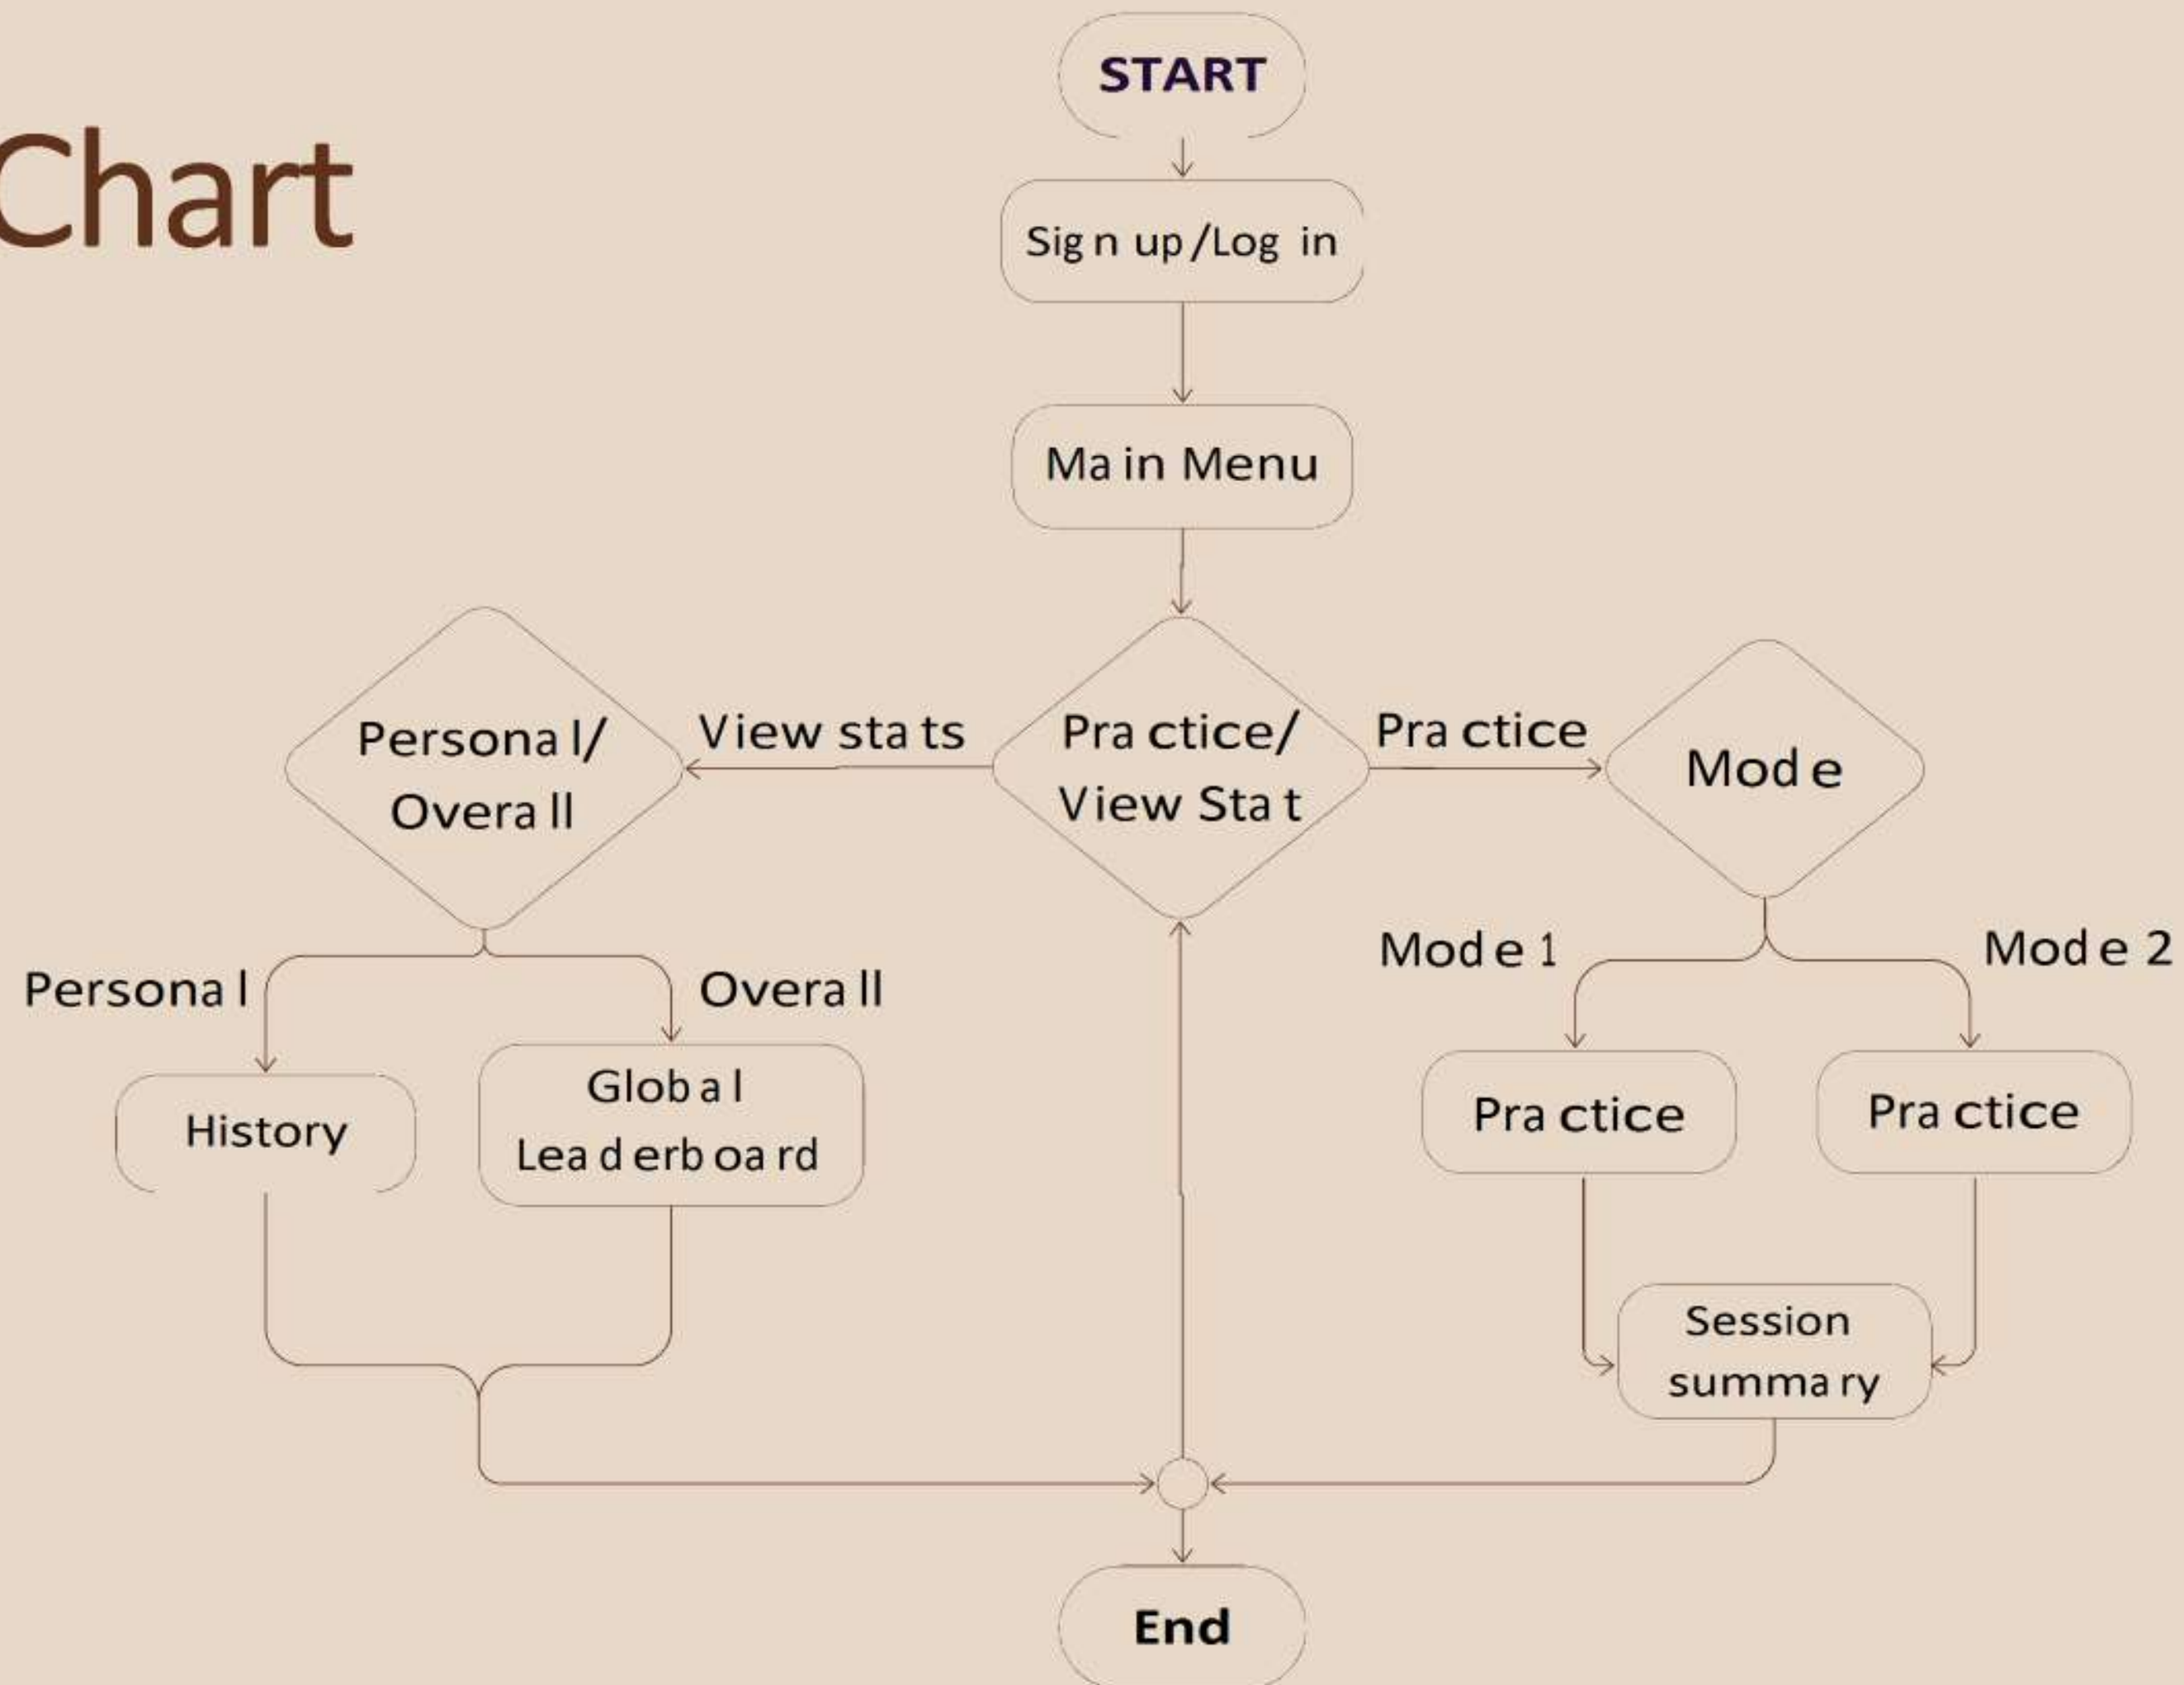

Color coded text

Application

- **User-friendly** environment
- Typing speed test tool is just **a command away**
- Improving typing in an **engaging way**
- Offline **lightweight** typing application
